

□ CHAPTER 6: Project Testing

6.1 Multi-Scenario Validation Log

Test ID	Targeted Feature Target	Test Scenario Vector Payload	Target Output Expectation	Status
TS-001	Risk Rejection Edge	Credit: 0, Income: 1500, Loan: 400	Status: Rejected	PASS
TS-002	Optimal Qualification	Credit: 1, Income: 8500, Loan: 100	Status: Approved	PASS
TS-003	Text Ingestion Resilience	Income Parameter passed text strings	Graceful Exception Trapping	PASS
TS-004	Dynamic Switching Loop	Toggle Selector from KNN to XGBoost	Active Adjustment of Multipliers	PASS

6.2 Pre-Processing Edge-Case Mitigation

- Input Coercion Security: When strings are supplied into mathematical numeric form attributes, the internal controller defaults seamlessly to a localized catch statement, assigning worst-case evaluation values instead of stopping the runtime engine thread.
